

Te Pae Christchurch Convention Centre is committed to best practice environmental sustainability through its Corporate Social Responsibility (CSR) program. Our aim is to minimise the potential for negative environmental impact and provide a positive social contribution in line with the United Nations Sustainable Development Goals.

**Te Pae Christchurch is committed to:**

- Striving to operate in an environmentally responsible and sustainable manner
- Reducing our environmental footprint
- Implementing a robust environmental management system to further reduce our impact over time

To assist in achieving this commitment, Te Pae Christchurch has implemented environmental sustainability systems in line with Enviromark Standards. This policy has been developed for our venue to support the commitments of the ASM Global Environmental Policy.

**To deliver this commitment, Te Pae Christchurch aims to:**

- Work in partnership with our suppliers to reduce our environmental impact and conduct business more efficiently
- Ensure our stakeholders are aware of our commitment to operating sustainably
- Source responsibly and evaluate the impact of our purchases, with sustainability included as a factor in our chosen options
- Monitor the consumption of electricity, water, and gas; work towards a year-on-year reduction in like-for-like data comparisons
- Continually improve our waste management systems to reduce the quantity of waste produced and divert from landfill
- Monitor our Building Management System (BMS) and taking action to maximise building efficiency and performance
- Publish appropriate information on the Centre's environmental performance
- Commit to the prevention of pollution into the local environment and ecosystem
- Ensure staff are trained and understand their environmental responsibilities within the context of operating procedures
- Work towards an audited and reputable environmental certification
- Comply with all legislative requirements

This policy will be updated on an annual basis and be available on our website for any interested parties.
